New Oil Discoveries in Kansas

BEREXCO, Inc., Wichita (KS), has established a new unnamed oil field in **Finney** County with the completion of their #1-21 Lacey, located in approximately NW NE SE of section 21- T26s- R33W. The wildcat well is producing an unknown amount of crude from the Mississippian Chester formation. The well was drilled to a total depth of 5,390 ft at site nearly one and one-quarter miles south of the Ivanhoe East field which also produces oil from the Mississippian. New field lies twelve miles southwest of Garden City, Kansas.

Reilly Oil Company, Inc., Wakeeney (KS), has discovered Lansing-Kansas City oil deposits at the #1-5 Angie well site in **Trego** County. The unnamed pool opener is producing an undisclosed amount of oil in approximately NW SE NE of section 5- T11s- R24W, about eight miles northeast of the town of Collyer, Kansas. The new reserves were discovered over one and one-quarter miles northeast of the Tidball East oil field which also produced LKC oil since 1977. The well was drilled to a total depth of 4,200 ft with tools provided by WW Drilling LLC.

Raymond Oil Company, Inc., Wichita (KS), has a new Marmaton oil discovery in **Wichita** County in the western part of the State. The firm's #1 G. & G. Smith, spotted in approximately NE SW SE of section 6- T20s- R35W, was placed on production for an undisclosed daily potential. The well was drilled to a total depth of 5,196 ft about one and one-half miles northeast of the Holstein field which Raymond Oil Company established in September last year. The Holstein field also produced Marmaton oil. The latest Smith discovery is located about ten miles south of Marienthal, Kansas. The new field has not been named.

Eagle Creek Corporation, Wichita (KS), has established a new unnamed Marmaton oil field in approximately NW NE SW of section 18- T17s- R34W in **Scott** County, near the Wichita County line. The #2-18 Barnhart - Wilkinson was drilled to a total depth of 4,925 ft by VAL Energy tools. Initial production rate is unknown. Closest known production near the new find lies nearly three and one half miles away in the SW/4 of section 33 where **New Gulf Operating LLC** recently completed its #1 Dale with Marmaton oil pay, thus opening the Isbel West field. Eagle Creeks field has not been named and is situated about six miles northwest of Modoc, Kansas.

Abercrombie Energy LLC, Wichita (KS), has completed the #1-36 Goering as a Marmaton oil producer in approximately the NE SW NW of section 36- T18s- R31W in **Scott** County. The well was placed on pump last month for an undisclosed potential. Well site lies over three-quarters mile northeast of three productive wells in the Grigston Northeast field which pumped over 120,000 barrels of oil from the Marmaton formation since 1982. The Goering well was bottomed at 4,637 ft, about eleven miles southeast of Scott City, Kansas. The new field has not been named.
