

19 New Fields Recognized in Kansas

The **Kansas Geological Society's Nomenclature Committee**, in association with the **Kansas Corporation Commission (KCC)** and the **Kansas Geological Survey**, recognized and named 19 new oil and gas fields in Kansas at a meeting held on November 11, 2014 in Wichita, Kansas. This brings the total number of *new fields* recognized in 2014 to 121, or 24 less discoveries that were completed in same period a year ago - down nearly 16.5 percent.

There were no new *"infield wildcat"* discoveries in established fields reported in October, thus the total number of new discoveries of *all types* in Kansas in 2014 is 126. This is 57 less discoveries (new and infield) compared to a year ago - a drop of nearly 31.1 percent. The Nomenclature Committee also extended the boundaries of several existing oil and gas fields, as well as, recognized new formation pay zone discoveries in 14 established fields.
