

Doug Louis Joins GSI Engineering LLC

Doug Louis has joined **GSI Engineering LLC** as a senior geologist and manager of GSI's environmental group. Doug brings to the GSI team 35 years of oil and gas technical and regulatory experience. Doug's experience, coupled with GSI's extensive experience with natural resources projects, uniquely positions the firm to develop fast, straight forward, cost-effective solutions to complex regulatory and environmental challenges throughout the Midwest.

In March 2014, the lesser prairie-chicken (LPC) was listed as a threatened species by the U.S. Fish and Wildlife Service. "From the listing of the LPC as a threatened species to the EPA regulations the industry is currently facing, GSI is your partner for lek (nesting) and vegetation surveys and drilling and operational compliance." said **Chuck Brewer**, P.G./President. "GSI has the tools and the environmental expertise to handle a broad range of regulatory needs." A few more services the company can provide includes:

- Develop SPCC plans and perform periodic inspections,
- Delineate oil and brine spills and perform the appropriate clean-up,
- Develop Storm Water Pollution Prevention plans, install and maintain industry practices and,
- Design well pads and tank battery sites in sensitive surface and groundwater areas.
