

Layfield announces the employment of Frank Strnad as Business Development Manager in Colorado

Layfield Environmental Containment is pleased to announce the employment of Mr. Frank Strnad as Business Development Manager based out of Denver, Colorado. Frank has a long and impressive professional background in the geomembrane industry. This includes providing environmental containment solutions for a variety of sectors including Oil and Gas, Water & Wastewater, Waste Management and Mining. Frank has managed a large number of major containment projects including liner installations for landfills, evaporation pits, frac pits, waste water ponds and secondary containment systems.

Frank will be responsible for promoting Layfield's full line of pit liners, frac tank liners, tank cover systems, floating covers and specialty geosynthetics required by the energy and municipal water sectors in Colorado, North Dakota, South Dakota, Minnesota, Nebraska, Utah, Kansas and Wyoming. Frank will also be working closely with the civil engineering and civil construction industry. For more information, contact Email: Frank.Strnad@LayfieldGroup.com, or call office: 1-720-618-5090.

Layfield Environmental Containment is a leading North American vertically integrated company involved in the manufacturing, fabrication, installation, and maintenance of high performance geomembranes and floating cover systems used for environmental containment.
