

Anderson Exploration LLC Provides Contract Drilling

A new company with years of experience and support of a well-known oil and gas family, business partners and associates, was formed in October last year by **Darrel Dean Anderson**, CEO. The firm, **Anderson Exploration LLC**, is headquartered in Wichita, Kansas and maintains a Field Office in Hill City, Kansas. The company provides contract drilling services, as well as, offers opportunities for investors.

Anderson Exploration's Rig No. 1 serves the Northwest and North Central regions of Kansas. The rotary rig is equipped with an EMSCO GA 250-T drawworks rated to depths up to 4,500 ft., a Lee C. More Double Derrick, and Gardner Denver FXX mud pump. A Geo-Shack (trailer), base, Doghouse, tool shed, water tank and premix system are also on each drill site. The rig itself has been in operation since 2000, however, Anderson's first contract well was in January this year.

Dean Anderson has 18 years of experience in drilling, logging, completion consulting, and managing large scale business programs. "We offer operators fixed price / turnkey drilling options to limit their exposure and allow them to provide better estimates. We also offer conventional contracts with competitive rates," Anderson said. In addition to the drilling business, Anderson Exploration LLC offers working interests in oil well drilling programs and other investment programs.
