

24 New Fields Recognized in Kansas

The Kansas Geological Society's Nomenclature Committee, in association with the Kansas Corporation Commission (KCC) and the Kansas Geological Survey, recognized and named 24 new oil and gas fields in Kansas at a meeting held on March 20, 2013 in Wichita, Kansas. This brings the total number of **new fields** recognized this year to 54, or 20 more new fields compared to the same period a year ago - a gain of nearly 58.8 percent.

There were 8 new "**infield wildcat**" discoveries recognized in established fields to bring the total number of new discoveries of **all types** this year in Kansas to 71. This is 35 more discoveries compared to a year ago for a gain of nearly 97.2 percent.

The Committee also extended the boundaries of 30 existing oil and gas fields and noted 17 new formation pay zone discoveries in various established fields. No abandoned fields were revived last month.
