

10 New Fields Recognized in Kansas

February, 2010

The **Kansas Geological Society's** Nomenclature Committee, in association with the **Kansas Corporation Commission (KCC)** and the **Kansas Geological Survey**, has named 10 new oil and gas fields in Kansas at a recent meeting held in Wichita, Kansas. This is 8 less fields than the number reported for the same period a year ago, a drop of nearly 44.4 percent.

There were 3 new "infield" discoveries recognized, bringing the total number of new oil and gas discoveries of *all types* in 2010 to 26. This is up by 3 fields, or 13.0 percent, compared to last year. New "Infield wildcat" discoveries are those wells located within established field boundaries but are over one-half mile from known oil production, or over one mile from known gas production in the field. The KGS Nomenclature Committee also extended the boundaries of 11 existing fields, recognized a new pay source in one field and revived one previously abandoned field.
