

11 New Fields Recognized in Kansas

The **Kansas Geological Society's** Nomenclature Committee, in association with the **Kansas Corporation Commission (KCC)** and the **Kansas Geological Survey**, has named 11 new oil and gas fields in Kansas at a recent May 2012 meeting held in Wichita, Kansas. This brings the total number of *new fields* recognized in 2012 to 45, or 19 more fields than was reported for the same period a year ago, a gain of nearly 74 percent.

There were 5 new "*infield wildcat*" discovery wells recognized thus bringing the total number of *new discoveries* of all types this year to 52. This is 21 more fields compared to a year ago, a gain of almost 68 percent.

The Nomenclature Committee also extended the boundaries of 29 existing fields, noted 10 new pay sources in various established fields, and recognized the revival of production in a previously abandoned field.
